#### RECLINER

A Baker recliner provides the ultimate in comfort by both reclining the back of the chair and extending a footrest. A recliner needs extra space both behind and in front of the chair to fully extend.

#### INCLINER

A Baker incliner creates the same relaxed seating experience as a recliner. The seat and inside back slide forward and a footrest extends while the outside back remains in a fixed position. An incliner needs extra space only in front of the piece.

While both recliners and incliners are available in stand alone chairs, only incliners are available in loveseats, sofas, and sectional groupings.
